

## **Case Study: Willowbrook Nursing Home** **Newbridge, Co. Kildare**

Willowbrook Nursing Home has installed 1 No. ACV Prestige 50 boiler as a replacement to their existing boiler.

Featuring a heat exchanger with stainless steel flue way, the Prestige range of wall-hung gas-fired condensing boilers reflects ACV's 80 years of experience in the use of stainless steel for heating and generating hot water. Prestige boilers are equally capable of meeting both individual needs and the demands of tertiary applications.

They can be cascaded to increase available output or installed in combination with HeatMasters or ACV water heaters for maximum stability of hot water supply.
